# COVID-19 News Supplement

Center for Healthcare Regulatory Insight

## COVID-19 by the Numbers

There have now been [roughly 49.7 million confirmed COVID-19 cases](#) in the US, with a death toll of nearly 795,000... Cases are [averaging approximately 120,000/day](#) up 26% over the past two weeks, with deaths [averaging over 1,300/day, up 14%](#) over the past two weeks.

477 million COVID-19 [vaccine doses have been administered](#) in the US (roughly 2.1 million/day over the past week)... More than 237 million Americans ([82% of Americans 12 and older](#)) have received at least one COVID-19 vaccine dose; nearly 201 million Americans are fully vaccinated (70.1% of Americans 12 and older); nearly 50 million Americans have received a booster or additional dose.

## Executive and Administrative Action

The US shipped [11 million COVID-19 vaccine doses to other countries last Friday](#), the most in a single day since shipments began.

USAID will [invest an additional \\$400 million](#) to support vaccine delivery in low- and middle-income countries, local vaccine manufacturing, and Rapid Response Surge Support to areas with surges in COVID-19 hospitalizations.

A Georgia district court [issued a nationwide injunction to put on hold](#) the Biden Administration's requirement that federal contractors get vaccinated against COVID-19.

## Healthcare Law, Business, and Policy News

A [KFF survey found that only 43% of parents are confident](#) that the COVID-19 vaccines are safe for children ages 5 to 11; 39% of parents are taking a "wait and see" approach on getting their kids in that age group vaccinated.

## Surveillance, Testing, and Treatment

FDA [authorized Pfizer-BioNTech's COVID-19 booster vaccine](#) for 16 and 17 year old children; [CDC recommended booster](#) doses for the age group.

Johnson & Johnson reported that [preliminary study results show that a booster of its COVID-19 vaccine administered six months](#) after a two-dose regimen of Pfizer-BioNTech's vaccine raised both antibody and T-cell responses.

Pfizer and BioNTech [reported that their COVID-19 vaccine](#) is most effective as a three-dose regimen, given recent laboratory data showing the first two doses may not provide enough protection against the Omicron variant.

Early [data reported by the South African Medical Research Council](#) suggest the Omicron [variant may cause less severe disease](#) (patients hospitalized for COVID-19 have been less likely to require supplemental oxygen).

FDA reported that [molecular COVID-19 tests](#) developed by Thermo Fisher Scientific, Verily Life Sciences, and nearly two dozen other companies may be able to detect the Omicron variant.

FDA [expanded emergency use authorization for Eli Lilly's combination monoclonal antibody therapy](#) to include patients under age 12 who have mild to moderate COVID-19 and are at high risk of progression to serious illness.

FDA [granted emergency use authorization to AstraZeneca's long-acting monoclonal antibody therapy](#) for prevention of COVID-19 infection in patients who are immunocompromised or unable to receive an authorized vaccine.

GlaxoSmithKline and Vir Biotechnology [reported their COVID-19 antibody therapy retained effectiveness](#) against the Omicron variant in lab studies.

Merck [announced a deal with Thermo Fisher Scientific](#) to manufacture its antiviral pill molnupiravir for distribution in Canada, the United Kingdom, and markets in the European Union, Asia Pacific, and Latin America... Knowledge Ecology International is attempting to [create a path for generic manufacturers to sell Pfizer's COVID-19 antiviral pill](#) in the Dominican Republic, which was excluded from a previous licensing deal to make the product available in 95 low- and middle-income countries.

*Wall Street Journal* reported on growing concerns among public health experts and patient advocates that [COVID-19 antiviral pills being considered for emergency use authorization are likely to be delayed](#) in reaching low- and middle-income countries.

Novartis is [continuing development on COVID-19 treatments](#), particularly a pill that could work broadly against coronaviruses, not just the one that causes COVID-19.

Gilead [recalled two lots \(55,000 vials\) of its COVID-19 therapy remdesivir](#) over [contamination from glass particles](#).

The World Health Organization [advised against using convalescent plasma](#) to treat patients with COVID-19, citing increasing evidence that it does not improve survival or reduce the need for mechanical ventilation.

The European Commission [recommended use of Roche's arthritis treatment Actemra](#) for adults who are severely ill with COVID-19.
